## REKA OIL

REKA BİTKİSEL YAĞLAR SAN.  
VE TİC. A.Ş.

# ABOUT US

• Reka Oil was established in April 2010. The company is headquartered in Istanbul, with its factory located in the Thrace region. Reka Oil's primary business is the production of bottled sunflower oil.

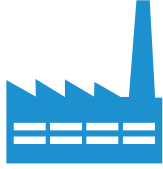

• Since 2017, Reka Oil has been part of the BIM Supermarkets group, which holds the largest market share in Turkey's organized retail sector.

# PRODUCTION CAPACITIES

**Crush**  
2.100 tons/day

**Refinery**  
1.100 tons/day

**Bottling**  
1.500 tons/day

Reka Oil owns Turkey's largest integrated edible oil plant. Crush division started production as of May 2013, refinery division started production as of October 2013.

# REKA OIL FACTORY

- Our factory, the largest integrated facility in Turkey, is situated in Muratlı, Tekirdağ, which is the country's most significant area for sunflower cultivation.
- The factory's proximity to the railroad (1.5 km) and port facilities (23 km) provides a logistical advantage for importing from major oilseed-producing countries like Bulgaria, Ukraine, and Russia, as well as for exporting via vessel and container shipments.
- It has an excellent access to urban edible oil consumer markets in the populous and wealthy Marmara region, which has 40% of the refined liquid oil market share.

## Has

- 190.000 m<sup>2</sup> open area
- 50.000 m<sup>2</sup> closed area
- 70.000 tons storage capacity for oilseed
- 50.000 tons storage capacity for oil

## Sunflower oil lecithin

Sunflower lecithin is a non-chemical food additive containing high concentration of phospholipids in free-flowing liquid form. It is obtained from 100% Crude Sunflower Oil and is suitable for use as natural emulsifying agents, surfactants, wetting agent, dispersing agent, antioxidant, stabilizing agent, viscosity reducing agent, antispattering agent, mixing and blending agents, release agent, conditioning, lipotropic surface-active agent in the food industry especially confectionery and bakery products.

## Sunflower oil deodestilate

Sunflower oil deodestilate is a by-product of refining. It is obtained 100% from Sunflower Oil and distillate is generally rich in free fatty acids, tocopherols, sterol and sterol esters, squalene, terpenic and aliphatic alcohols, mono-, di- and triglycerides, degradation products of fatty acids, aldehydes and ketones. Economically important fatty acids, squalene, sterol and tocopherol are obtained from deodorization distillate and it is suitable for use in feed, soap production and oleo chemistry industry.

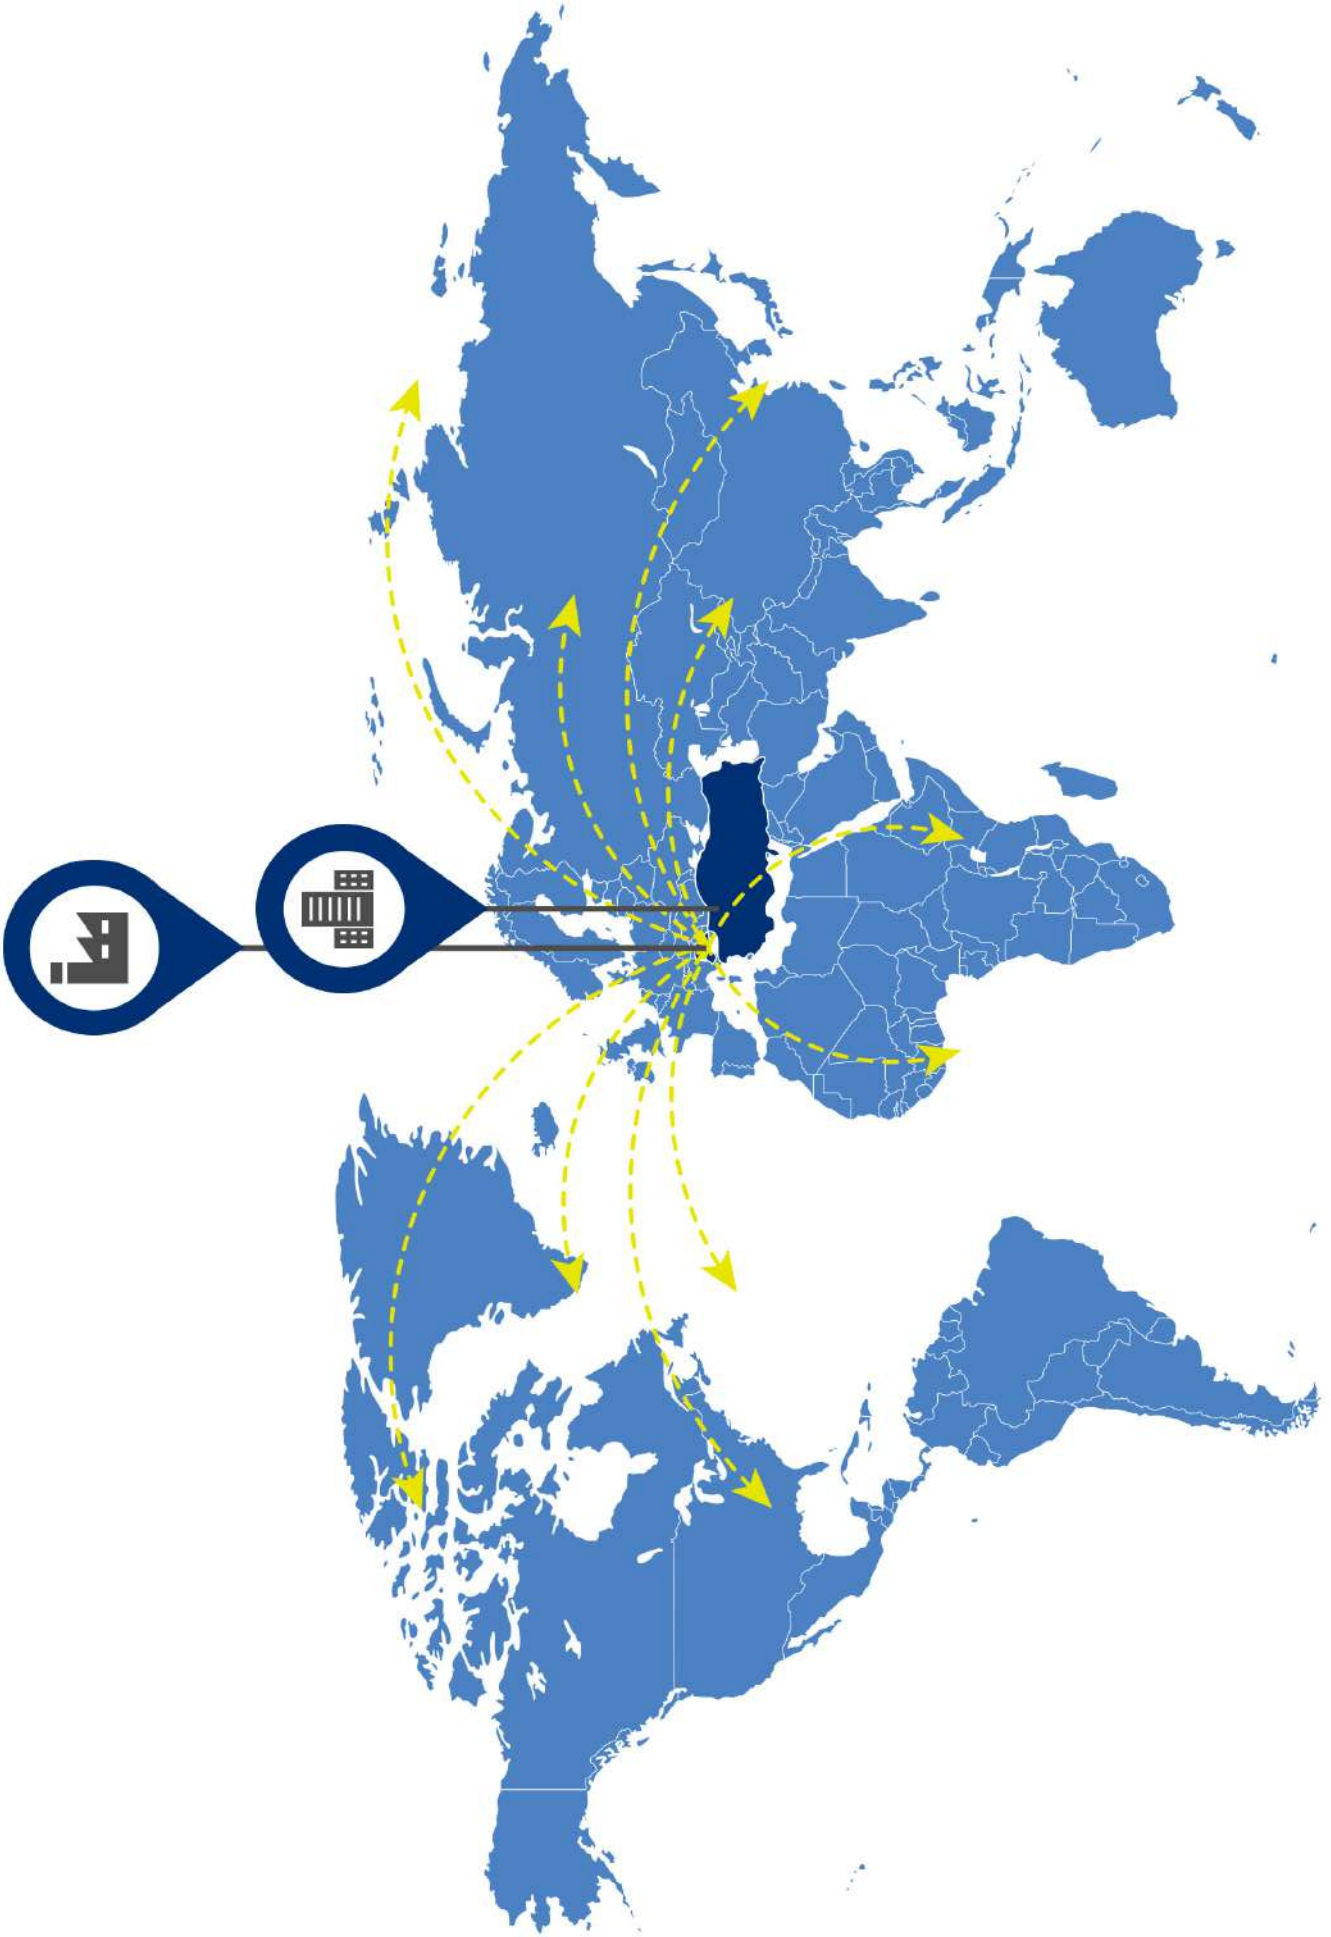

# QUALITY

Our factory has high technology equipped laboratory.

Our quality certificates are;

# REKA

# OIL
